

HandE-Menus

Fully Multi lingual menu browser and customer order system

Tablet menus designed for customers to use at the table.

Easy menu browsing

Menu browsing includes time of day menus, menu groups and special offers. Items include not only descriptions but product photos, nutritional guides, ingredients and allergen notices.

The multi-lingual interface allows customers to navigate, view menu details and order in their own language.

Direct ordering

Orders can be taken on the tablet, with details sent to kitchen and bar printers. Order details are saved to the EPOS for billing. If preferred, direct ordering can be turned off and a call waiter button will appear.

Integrated solution

Out of stock items cannot be ordered, preventing embarrassment to staff. HandEMenu links with our CAEPOS suite of products.

Whatever the requirement; Menu displays, Customer information, Ordering terminals, Menu item labeling, Promotions boards, Allergen information, Tablet menus - **Custom Adaptive** are here to help.

Branding and Customisation

As with all Custom Adaptive products, the menus can be branded and adapted to suit your establishment, Custom adaptive have a number of tablet styles, cases and mounting options to suit your location.

Full nutrition and allergy information

The Hand E-Menu allows lookup of nutrition and allergen information via the menu(s) keeping you compliant with the law changes introduced in December 2014 and due in December 2016. Customers can flag allergen issues and the menu adapts to what they can order, as well as alerting the kitchen with the order. HandEMenu avoids issues of temporary or part time staff giving incorrect information about the products on sale.

Fully integrated

HandEPOS is part of our CAEPOS system. Cloud based menu management and reporting Suitable for Restaurants, Bars, Pubs, Hotels, and Cafes.
